

What is this unit about?

Online learning allows you to undertake learning at your pace and in a flexible manner, but it also requires us to learn new skills for interacting with peers and faculty. In this unit, you will get introduced to the format of the course and get familiar with the navigation of an online course platform. We will be working with a Learning Management System called Moodle, and you will need a digital device with internet connectivity to access this course.

Objectives

- Getting familiar with the Moodle interface for navigating the course
- Learning to access the course, download and upload content and participate in the forum for self-introduction
- Getting familiar with local language keyboard input on the mobile phone

Activities

1. Logging into the course page and navigating to the different units
2. Following links given on the course page and accessing weblinks
3. Downloading the resources shared on the course platform - Sample Resource-1 Sample Resource-2
4. Posting in the Discussion Forum
5. Submitting the Introductory assignment

Discussion Forum

Can you introduce yourself?

If you are a teacher, please do not forget to mention the name of your school and classes handled by you.

You can also use pictures/ audio exploring the Advanced button in the Reply option. You can unleash your creativity to introduce yourself.

Introductory Assignment

What do you wish to learn from this course? You can either type in the submission area or record your response as an audio file with 2-3 sentences

and upload the audio file to your Google Drive. Kindly provide the google drive link of that audio file in the submission area.
